

Animal and Plant Health Inspection Service, USDA

§ 318.47

States, or the continental United States.”

[24 FR 10777, Dec. 29, 1959, as amended at 36 FR 24917, Dec. 24, 1971; 37 FR 10554, May 25, 1972]

§ 318.30a Administrative instructions authorizing movement from Puerto Rico of certain sweetpotatoes grown under specified conditions.

The Deputy Administrator of the Plant Protection and Quarantine Programs hereby finds that facts exist as to the pest risk involved in the movement of sweetpotatoes to which § 318.30 applies, making it safe to modify by making less stringent the requirements of § 318.30 with respect to washed sweetpotatoes graded by inspectors of the Commonwealth of Puerto Rico in accordance with Puerto Rican standards which do not provide a tolerance for insect infestation or evidence of insect injury and found by such inspectors to comply with such standards. Hereafter, in addition to movement authorized under § 318.30(c), such sweetpotatoes will be eligible for inspection by a Branch inspector to determine whether they are free of the sweetpotato scarabee (*Euscepes postfasciatus* Fairm.) and for certification for movement from Puerto Rico to Baltimore, Maryland, and Atlantic Coast ports north thereof if found free of such insect, provided the sweetpotatoes are certified by an inspector of the Commonwealth of Puerto Rico as having been so washed and graded and as having been grown in accordance with the following procedures:

(a) Fields in which the sweetpotatoes have been grown shall have been given a preplanting treatment with an approved soil insecticide.

(b) Before planting in such treated fields, the sweetpotato draws and vine cuttings shall have been dipped in an approved insecticidal solution.

(c) During the growing season an approved insecticide shall have been applied to the vines at prescribed intervals.

The sweetpotatoes shall be inspected by an inspector of the Plant Protection and Quarantine Programs prior to shipment from Puerto Rico.

Subpart—Territorial Cotton, Cottonseed, and Cottonseed Products

QUARANTINE

§ 318.47 Notice of quarantine.

(a) The Secretary of Agriculture having previously quarantined Hawaii and Puerto Rico on account of the pink bollworm of cotton (*Pectinophora gossypiella* Saunders) and the cotton blister mite (*Eriophyes gossypii* Banks), insect pests new to and not widely prevalent or distributed within and throughout the United States, now determines that it is necessary to extend the quarantine to prevent the spread of these insects from the Virgin Islands of the United States, where they are known to occur.

(b) Under authority conferred by section 8 of the Plant Quarantine Act of August 20, 1912, as amended (7 U.S.C. 161) and having given the public hearing required thereunder, the Secretary of Agriculture hereby quarantines the Territory of Hawaii, Puerto Rico, and the Virgin Islands of the United States to prevent the spread of the said insect pests.

(c) All parts and products of plants of the genus *Gossypium*, such as seeds including seed cotton; cottonseed; cotton lint, linters, and other forms of cotton fiber; cottonseed hulls, cake, meal, and other cottonseed products, except oil; cotton waste; and all other unmanufactured parts of cotton plants; and all second-hand burlap and other fabric which have been used, or are of the kinds ordinarily used, for wrapping or containing cotton, are hereby prohibited movement from the Hawaii, Puerto Rico, and the Virgin Islands of the United States into or through any other State, Territory or District of the United States, in manner or method or under conditions other than those prescribed in the regulations hereinafter made or amendments thereto: *Provided*, That whenever the Deputy Administrator of the Plant Protection and Quarantine Programs shall find that existing conditions as to the pest risk involved in the movement of the articles to which the regulations supplemental hereto apply, make it
